

# Infusion Therapy

Most people prefer to recover from an illness or manage their condition in the comfort and privacy of their own home. Home infusion therapy may be a safe and effective alternative to inpatient care.

## Home Infusion Therapies provide:

- Parenteral nutrition TPN
- Anti-infectives
- Cardiac/Inotropic therapies
- Alpha-1 therapies
- Chemotherapy treatments
- Pre- and post-Transplant therapies
- Pain management and Palliative care
- IVIG therapy - Intravenous (IV) and subcutaneous (SC)
- Hydration

## Pharmacy Services offered:

- Pharmacokinetic profiles and trended lab results
- Drug choice and dosing recommendations
- Compounding specific to patient needs
- Ongoing clinical monitoring
- Formulation of recommendations based on clinical and laboratory assessment
- Communication with physicians and home care teams
- All medications/supplies are delivered
